

## **Parish Footpaths Report February 2021**

Due to the very wet and cold weather few paths have been walked but some in Cotheridge have had their waymarks checked and replaced where necessary.

Dog walkers are having problems using the stiles as landowners have used wire on the lower struts to manage their stock. The County will supply free metal gates to landowners to replace old stiles on legal footpaths. However, I do not know who the landowners are in most cases, so any information concerning land ownership will be gratefully received.

County maps with footpath labelling are available for the public to use and report problems at:
